DETAILED ACTION

1. A request for continued examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed 9/20/04 in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's amendment and remarks, filed 9/20/04, have been entered.
2. Claims 30-33, 37-39, and newly added Claims 43-47 are pending and being acted upon.
3. In view of Applicant's remarks, the previous rejection of Claim 39 for the recitation of a "T-cell mediated autoimmune disease" has been withdrawn.
4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
5. Claims 30-33, 38, 39, 43, and 45 stand/are rejected under 35 U.S.C. § 112, first paragraph, as the specification does not contain a written description of the claimed invention, in that the disclosure does not reasonably convey to one skilled in the relevant art that the inventor(s) had possession of the claimed invention at the time the application was filed. This is a new matter rejection.

The specification and the claims as originally filed do not provide support for the invention as now claimed, specifically:

- A) In Claim 30, a fusion immunotoxin comprising ... a diphtheria toxin moiety ... wherein about 152-145 carboxy terminal amino acid residues are truncated from the native diphtheria toxin moiety, and,
- B) In Claims 38 and 43, a method for inhibiting rejection of transplanted tissue or organs in a subject
- C) In Claim 45, a fusion immunotoxin comprising ... a diphtheria toxin moiety ... wherein about 152 or 145 carboxy terminal amino acid residues are truncated from the native diphtheria toxin moiety,

are not supported by the specification.

Regarding A), Applicant argues that the disclosure of mutants DT 390, DT383, DT370 and MSPA5 support the claim. Applicant further argues that mutants truncated between 145 and 152 would be effective because the intervening amino acids have been shown to not be required.

Applicant is advised that the disclosure of 4 specific truncation mutants provides insufficient written support for the range of mutants of the claims, e.g., mutants including DT151, DT150, DT149, etc. Additionally, the claim recites "about" thus, broadening the claim to include mutants such as DT153, DT154, etc. Regarding the effectiveness of the various mutants, Applicant's argument in this regard would be appropriate for an enablement rejection, but not a rejection for inadequate written description.

Regarding B), the specification discloses only a method of treating graft versus host disease, leukemias and lymphomas, and AIDS, but not a method of inhibiting rejection of transplanted tissue or organs.

Regarding C), the specification does not disclose "about" 152 or 145.

6. Claims 37, 44, 46, and 47 are allowed.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.

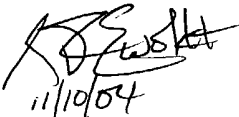

8. **Please Note:** Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
